As business environment changes, JenniferSoft will put much focus on research and development to make Web performance management software much smarter. By applying and operating such software into various client environments, the product will be proven to be stable. We assure you that higher level of technology, technical support, education and satisfying performance management service will be offered.

GLOBAL

Provide software to overseas markets including Europe, Japan and China.
Establish branch and corporate in global market (Europe, Japan, Thailand, Malaysia, and China)

SERVICE

Education and Technology through wide experience and high technical skill
Provide technical support and customer service
Performance Management, Performance Monitoring, Performance related Education

SOLUTIONS

Provide effective and smart Web APM solution

Company Vision and Mission

As a global software company, JenniferSoft dedicates itself to develop APM solution. We are trying to create a corporate culture that our members could engage in free debate without any constraints. By doing so, we are able to provide you with excellent software.

JenniferSoft respects the work-life balance of entire member, communication and empathy under the autonomous environment, and trust each other. Based on these philosophies, we are making our environment more creative and passionate. JenniferSoft continues to be a company making together and to build a healthy corporate culture.

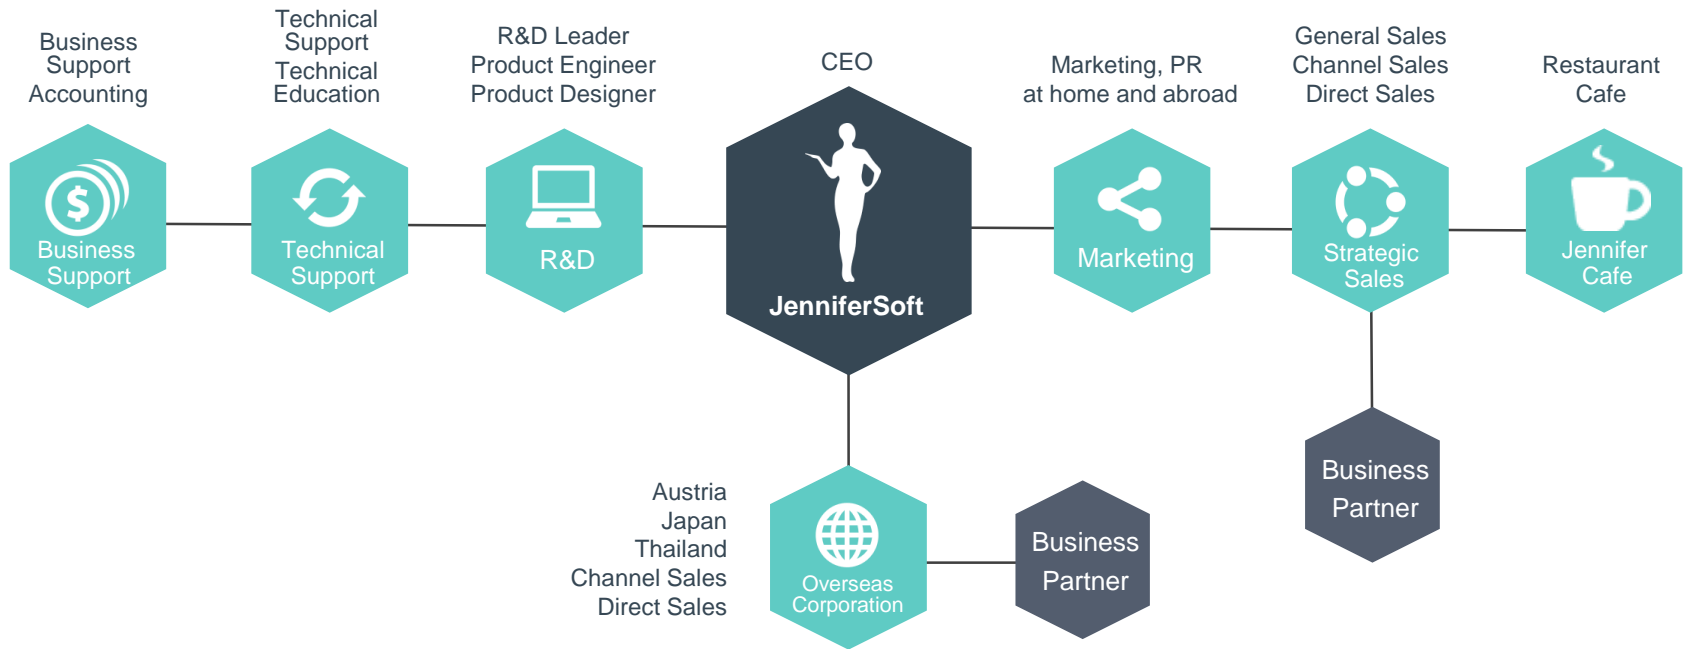

“

Information Technology only exists to make our life comfortable as it responds to universal values. Technology is massive result of deliberate endeavor of human being in order to be in harmony with nature. Based on inherent nature, we need to make unconstrained and convenient relationship between technology and human to make technical improvement.

”

Company Organization

Although JenniferSoft is small company, its structure is flexible. We intend to have best quality of products and technology in the world. All the members are interlocked each other due to horizontal culture. We always study and think to be able to do our tasks impassionedly and creatively. JenniferSoft will respond to changing environment by working together rather than competing each other. We will be a company making the product we need the most in performance management field through continuous research and development.

Corporate Culture

Global Software Company

JenniferSoft has made its best efforts to establish sound relationships of trust with worldwide solution reselling partners and our customers. As a result, more than 1000 enterprises are currently using JenniferSoft's JENNIFER® to manage their web performance.

Product philosophy

APM is a solution monitoring application performance for professionals. But it does not need to be heavy or too formal. You will experience much convenience and beauty from JENNIFER. We were imagining you using JENNIFER much easily and beautifully when we developed.

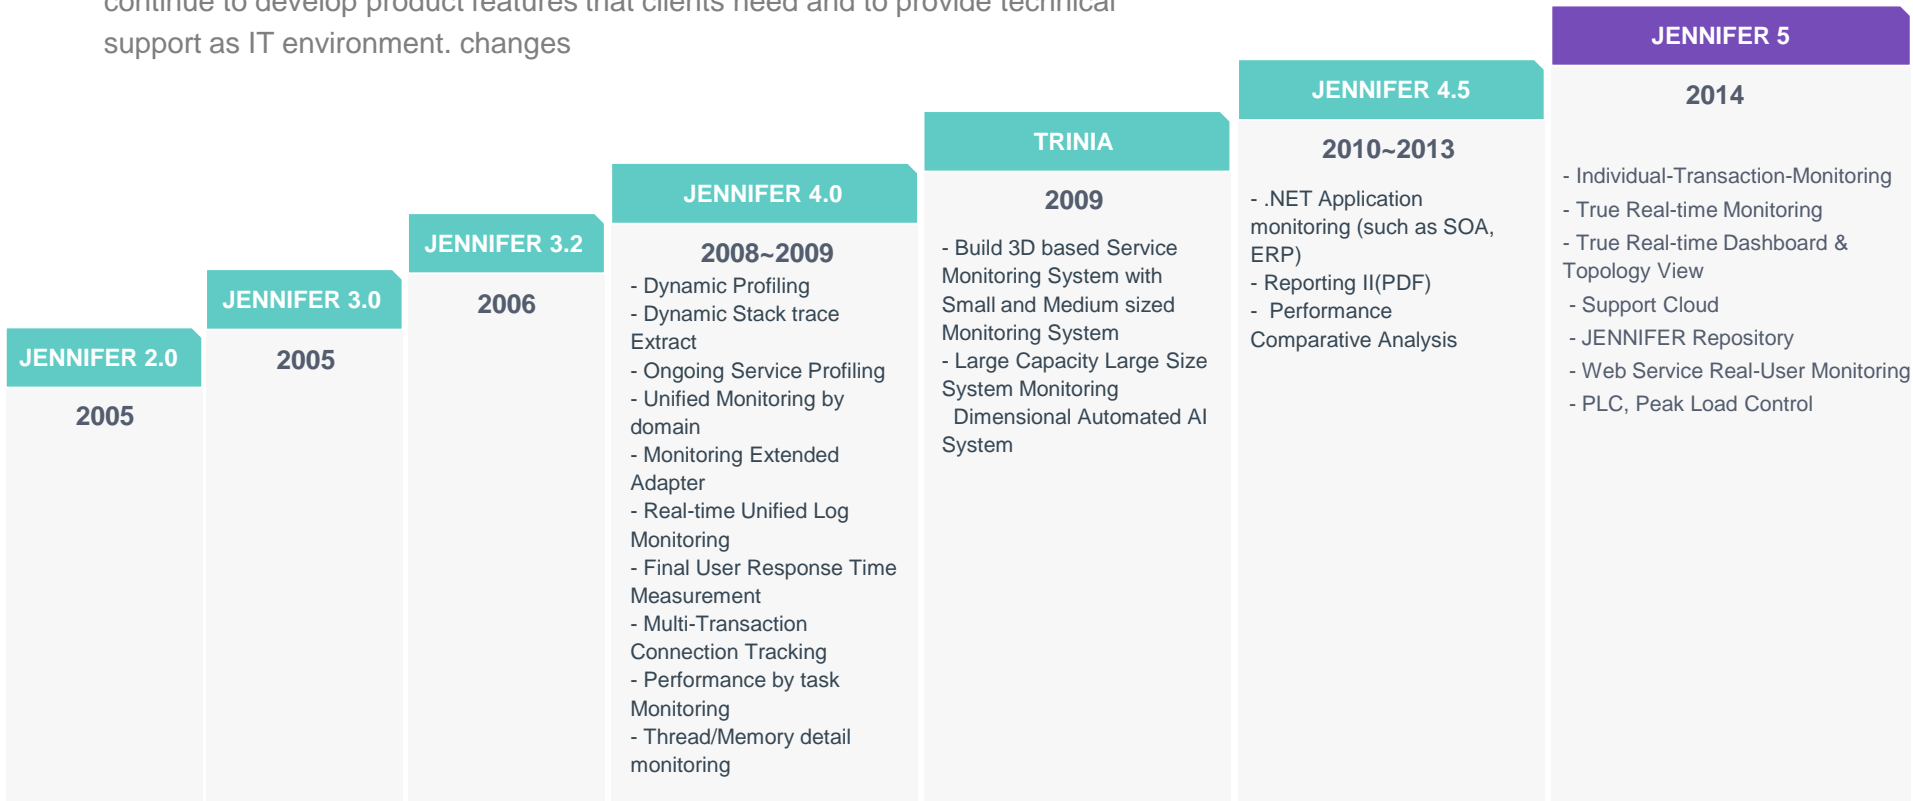

Healthy Corporate Culture

Based on work-life balance, autonomous environment, creativity and passion, we pursue the motto of healthy work and decent life. Jennifersoft is small but strong. Our history is short but sustainable. We might not be doing enough but we will fill the missing pieces.

Product Roadmap

As a leading APM company, the JenniferSoft has maintained over 70 percent market share. The company was positioned as standard in APM market. Since JENNIFER launched in 2005, JenniferSoft has been supporting its clients in a way that they could control performance management under JAVA and .NET environment by expanding .NET features. With committing its own duty, the JenniferSoft has planned to strengthen features of APM.

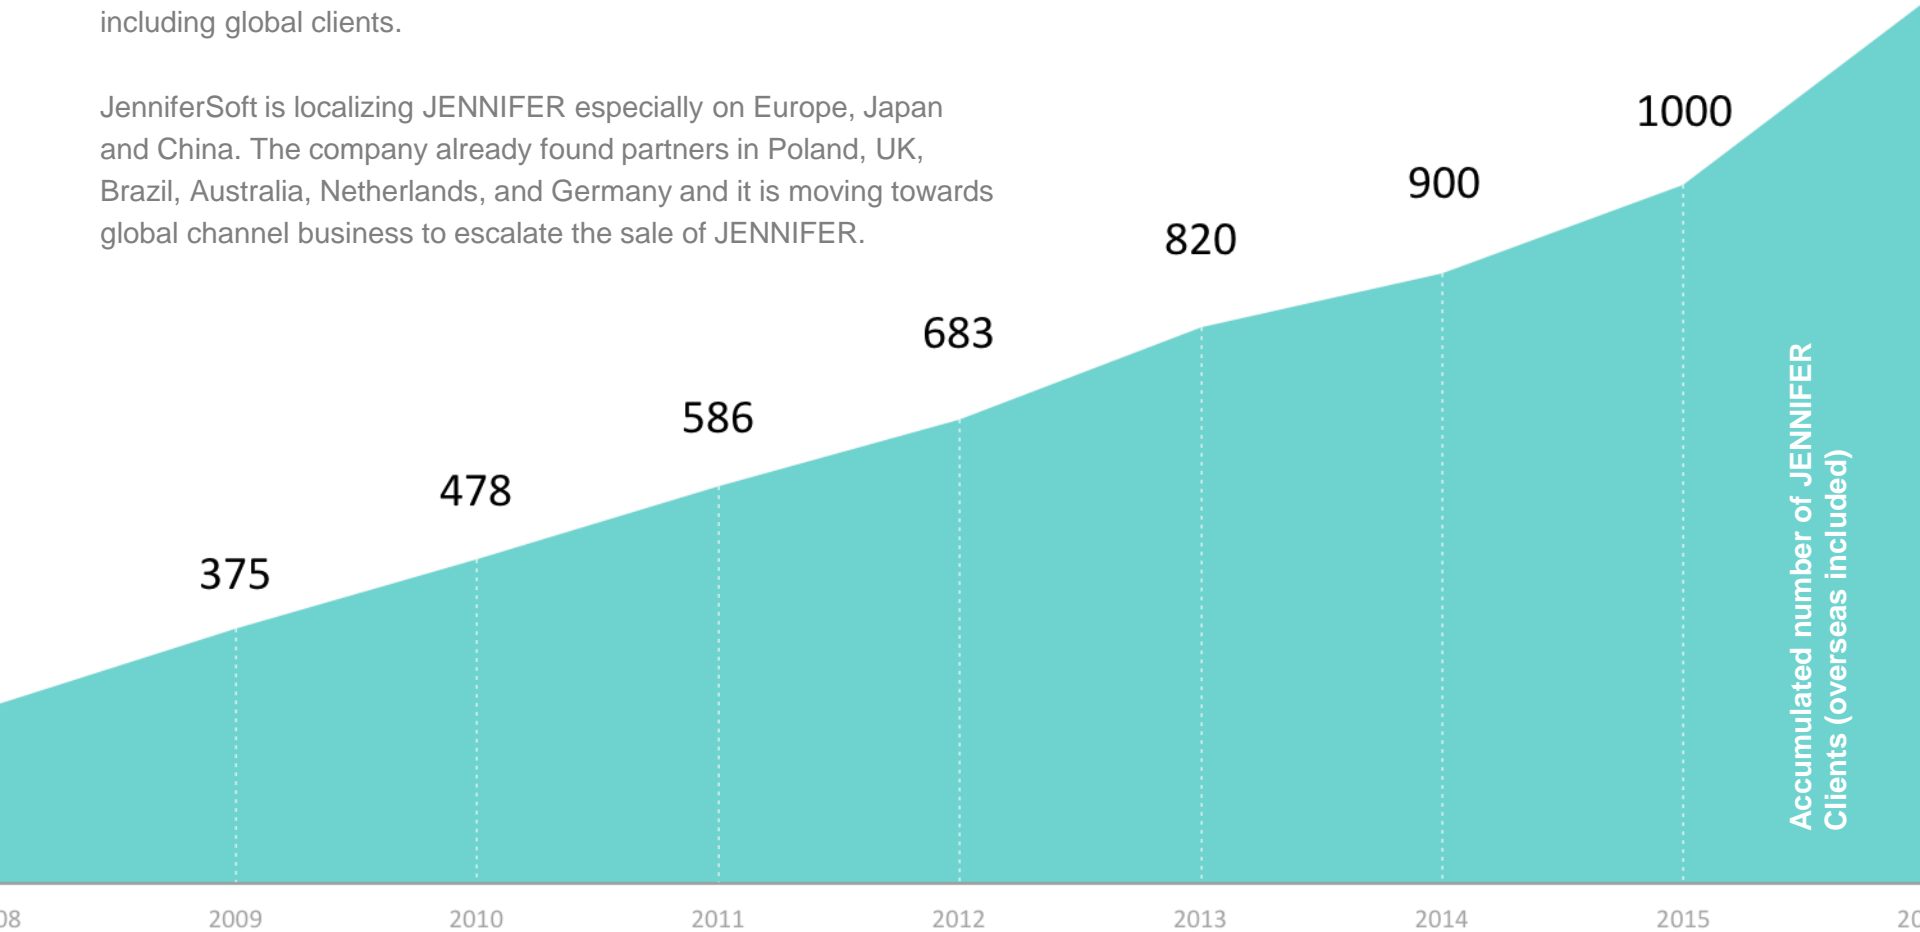

JenniferSoft has led the APM market with its advanced technology and new approach towards Web System Performance Management. The company will continue to develop product features that clients need and to provide technical support as IT environment. changes

Accumulated number of JENNIFER Clients

Since its launch, JENNIFER has created over 80 to 100 new clients every year. The accumulated number of clients increased to 1000 including global clients.

JenniferSoft is localizing JENNIFER especially on Europe, Japan and China. The company already found partners in Poland, UK, Brazil, Australia, Netherlands, and Germany and it is moving towards global channel business to escalate the sale of JENNIFER.

IS Solutions Plc

IS Solutions was formed in 1985 and was initially involved in hardware sales and facilities management. In 1989, we expanded the company with the creation of a software development division, which facilitated our movement into the growing area of application development, and this evolution continued with our entry into the Internet market in 1994. Our focus is on specifying, delivering and managing high quality website design and “line of business” development projects – we have successfully completed hundreds of projects for scores of clients and pride ourselves on our ability to create and maintain long-term.
